

ANA LIFFEY DRUG PROJECT Naloxone stories from the Midwest

Insights from staff and service users to mark International Overdose Awareness Day 31st August 2021

#TimeToRememberTimeToAct

"I used naloxone in a hostel setting. I came across a friend overdosing, I got my naloxone out and used it on my friend. My friend came around after a couple of minutes. Naloxone is a life saver, I felt very proud of myself, everybody should have naloxone" Damo, Service User

"Having come across a young male overdosing in a public toilet in Limerick City, I had no naloxone in my possession the only option I had was to perform CPR. A couple of weeks later I came across a young women overdosing in a park, this time I had naloxone with me. I administered the naloxone which resulted in the young girl coming out of the overdose. The difference I felt, the confidence I had knowing I had naloxone on me, it made all the difference, naloxone saves lives"

Pat, Staff Member

"I only used it last week, I panicked at first, and I didn't know where I left the naloxone. When I found it, I used it straight away and called an ambulance. The ambulance driver said I saved that kids life. I felt very proud. Naloxone should be in vending machines all over the city " Chris, Service User

"I was afraid at first incase I gave them too much so I stuck it into the top of his leg and gave him 2 doses instead of one because I panicked as it was my first time doing it. Then I was so happy when I seen him coming around and he started shivering and seemed really cold so I put a jumper on him first and then a cardigan around him and I was so happy I had actually saved someones life. I recommend naloxone 100% because it will and has saved so many peoples lives" Teresa, Service User

"Naloxone saves lives and has saved many of my friends. I feel proud to carry naloxone around and have given it to friends overdosing. It's a lifesaving drug, and it helps and will continue to help save many people's lives in Limerick City" AP Service User

"My daughter, who is 3 years off drugs, told me she had overdosed in the past. Her boyfriend used naloxone on her to save her life. My lovely daughter who is doing so well and I have a wonderful relationship now with only for naloxone we would not have today. My daughter has come a long way from then and as a parent I am very grateful that she had naloxone on that day" Family Member

"I have never used naloxone on anyone before, but having been the person who overdosed and my friend using it on me, shows naloxone works. I do believe had the person not given me naloxone I would not be able to say this piece today. I am forever grateful for what that person has done and I now carry naloxone with me"

Shannon, Service User

"I came across a person overdosing, I was terrified but remembered the training I had got and I always carried naloxone in my bag. I got over the fear and used it, I felt brilliant saving someone's life. 100% everybody should carry naloxone on them" Will, Service User
